

Market Discipline

Disclosures on Risk Based Capital (Pillar III of Basel Framework)

For the year ended 31 December 2017

Background: The disclosures under Pillar III of Basel III are made according to revised ‘Guidelines on Risk Based Capital Adequacy’ (Revised Regulatory Capital Framework for banks in line with Basel-III) for banks issued by Bangladesh Bank (Central Bank of Bangladesh). These qualitative and quantitative disclosures are intended to complement the Minimum Capital Requirement (MCR) under Pillar I and the Supervisory Review Process (SRP) under Pillar II of Basel III. The provision of meaningful information about common key risk metrics to market participants is a fundamental estimation of a sound banking system. The purpose of market discipline is to disclose relevant information on capital adequacy in relation to various risk of the bank so that stakeholders can assess the position of a bank regarding holding of assets and to identify the risks relating to the assets, risk exposures, risk assessment processes and capital adequacy to meet probable loss of assets as well as can make the economic decision. The disclosure framework does not conflict with requirements under accounting standards as set by Bangladesh Bank from time to time. The following principles aim to provide a solid foundation for achieving transparent, high-quality Pillar III risk disclosures that will enable users to better understand and compare a bank’s business and its risks. For each separate risk area (e.g. investment, market, operational, banking book interest rate risk, equity) banks describe its risk management objectives and policies, including:

- strategies and processes
- the structure and organization of the relevant risk management function
- the scope and nature of risk reporting and/or measurement systems policies for hedging and/or mitigating risk and strategies and processes for monitoring the continuing effectiveness of hedges.

The principles of these disclosures are as follows:

- The disclosures are clear
- The disclosures are comprehensive
- The disclosures are meaningful to users
- The disclosures are consistent over time
- The disclosures are comparable across banks

The following components set out in tabular form are the disclosure under Pillar-III as on 31 December 2017 are as under:

- A. Scope of Application
- B. Capital Structure

Disclosures on Risk Based Capital (Pillar III of Basel III)

- C. Capital Adequacy
- D. Investment Risk
- E. Equities: Disclosures for Banking Book Positions
- F. Profit Rate Risk in the Banking Book (PRRBB)
- G. Market Risk
- H. Operational risk
- I. Liquidity Ratio
- J. Leverage Ratio
- K. Remuneration

A) Scope of Application		
Qualitative Disclosures:		
a)	The name of the top corporate entity in the group to which this guidelines applies.	Export Import Bank of Bangladesh Ltd.
b)	An outline of differences in the basis of consolidation for accounting and regulatory purposes, with a brief description of the entities within the group	<p>EXIM Bank has 3 (Three) subsidiaries as on the reporting date namely; EXIM Exchange Company (UK) Limited, EXIM Exchange Company (Canada) Limited, and EXIM Islami Investment Limited.</p> <p>A brief description of the Bank and its subsidiaries are given below:</p> <p>Export Import Bank of Bangladesh Ltd.</p>
	(i) that are fully consolidated;	<p>Export Import Bank of Bangladesh Ltd. (EXIM Bank) was incorporated as a public limited company in Bangladesh under Companies Act, 1994. C) Capital Adequacy		
Qualitative Disclosures:		
a)	A summary discussion of the bank's approach to assess the adequacy of its capital to support current and future activities.	<p>In terms of RBCA guidelines on Basel-III framework issued by Bangladesh Bank, the bank has adopted</p> <ul style="list-style-type: none"> a) Standardized Approach for Credit (Investment) Risk; b) Standardized (rule based) approach for Market Risk and c) Basic Indicator Approach for Operational Risk. <p>As per capital adequacy guidelines, the bank is required to maintain a minimum CRAR of 10.00% with regards to Credit risk, Market risk and Operational risk.</p> <p>EXIM Bank focuses on strengthening and enhancing its risk management culture and internal control processes rather than increasing capital to cover up weak risk management and control practices. The bank has been generating most of its incremental capital from retained profit (stock dividend, transfer to statutory reserve) to balance the incremental growth of Risk Weighted Assets (RWA). So far, The bank has issued BDT 650.00 Crore Mudaraba Subordinated Tier II Bond. Moreover, the bank is going to issue BDT 500.00 Crore Mudaraba Subordinated (3rd Issuance) Tier II Bond in 2018 to strengthen its further capital base. The Bank's policy is to manage and maintain strong Capital to Risk-weighted Asset Ratio (CRAR) through investing on those who are high grade rated investment customer and those who are low risk weight bearing customer. The bank is able to maintain capital to risk weighted asset ratio at 12.11% on Solo basis against the regulatory minimum level of 10.00%. In addition to the MCR, Capital conservation Buffer (CCB) is also considered while maintaining the Capital to Risk Weighted Asset Ratio. Capital for BDT 3481.45 Crore well above the regulatory MCR and CCB is meant for supporting anticipated future business growth and to serve as a buffer for unexpected shock thereby ensuring that the Bank's CRAR does not fall below the regulatory minimum level even in adverse condition and also can be considered as sufficient for Pillar II requirement and ultimately can be treated as adequate capital. The Bank's policy is to manage and maintain its capital with the objective of maintaining strong capital ratio and high rating. The Bank also ensures that the capital levels comply with regulatory requirements and satisfy the external rating agencies and other stakeholders including depositors. The whole objective of the capital management process in the Bank is to ensure that the Bank remains adequately capitalized at all times.</p>

D) Investment (Credit) Risk		
Qualitative Disclosures:		
a)	The general qualitative disclosures:	
	<p>* Definitions of past due and impaired (for accounting purpose)</p>	<p>An investment payment that has not been made as of its due date is called past due/overdue. Failure to repay an investment on time could have negative implications for the customer's credit worthiness or cause the investment terms to be permanently adjusted. In case of past due investment, the bank may charge compensation which does not come under bank's income rather the charges use for benevolent purpose.</p> <p>An investment is impaired when it is not likely the bank will collect the full value of the investment because the creditworthiness of a customer has fallen. The bank will pursue either restructuring or foreclosure as a result of the impaired status of the investment. Further, the bank must report the investment as impaired on any of its financial statements and CIB of Bangladesh bank.</p> <p>With a view to strengthening investment discipline and bring classification and provisioning regulation in the line with international standard, a phase wise program for classification and provisioning was undertaken by the Bank as per Bangladesh Bank circulars issued from time to time. In this regard, all the investments are grouped into four categories for the purpose of classification, namely (i) Continuous Investment, (ii) Demand Investment, (iii) Fixed Term Investment and (iv) Short-term Agricultural and Micro Investment. The above investments are classified as follows:</p> <p>Continuous & Demand Investment are classified as under:</p> <ul style="list-style-type: none"> • Sub-standard- if it is past due/overdue for 3 months or beyond but less than 6 months; • Doubtful- if it is past due/overdue for 6 months or beyond but less Than 9 months; • Bad/Loss- if it is past due/ overdue for 9 months or beyond. <p>Fixed Term Investment (More than Tk. 10.00 Lac) is classified as:</p> <ul style="list-style-type: none"> • Sub-standard- if the defaulted installment is equal to or more than the amount of installment (s) due within 3 (three) months, the entire investments are classified as "Sub-standard". • Doubtful- if the defaulted installment is equal to or more than the amount of installment (s) due within 6 (six) months, the entire investments are classified as "Doubtful". • Bad/Loss- if the defaulted installment is equal to or more than the amount of installment (s) due within 9 (nine) months, the entire investments are classified as "Bad/Loss". <p>Fixed Term Investment (Up to BDT 10.00 Lac) is classified as</p> <ul style="list-style-type: none"> • Sub-standard if the defaulted installment is equal to or more than the amount of installment (s) due within 6 (six) months, the entire investments are classified as "Sub-standard".

Disclosures on Risk Based Capital (Pillar III of Basel III)

**Description of approaches followed for specific and general allowances and statistical methods:	<ul style="list-style-type: none">• Doubtful- if the defaulted installment is equal to or more than the amount of installment (s) due within 9 (nine) months, the entire investments are classified as “Doubtful”.• Bad/Loss- if the defaulted installment is equal to or more than the amount of installment (s) due within 12 (twelve) months, the entire investments are classified as “Bad/Loss”.																																																							
	Short-term Agricultural and Micro Investment are classified as																																																							
	<ul style="list-style-type: none">• Sub-standard- - if the irregular status continue after a period of 12 (twelve) months, the investments are classified as “Sub-standard”.• Doubtful- if the irregular status continue after a period of 36 (thirty six) months, the investment are classified as “Doubtful”.• Bad/Loss- if the irregular status continue after a period of 60 (sixty) months, the investment are classified as “Bad/Loss”.																																																							
	<p>** A Continuous, Demand or Term Investment which will remain over due for a period of 60 days or more, are treated as “Special Mention Account (SMA)”.</p>

**Discussion of the bank’s investment (credit) risk management policy.																																																								
<p>Risk is inherent in all aspects of a commercial operation; however for Banks and financial institutions, investment (credit) risk is an essential factor that needs to be managed. Investment (credit) risk is the possibility that a borrower or counter party will fail to meet its obligations in accordance with agreed terms. Investment (Credit) risk, therefore, arises from the bank’s dealings with or lending to corporate, individuals, and other banks or financial institutions. To manage investment (credit) risk EXIM bank follows “Bangladesh bank’s Circulated CREDIT RISK MANAGEMENT guidelines”.</p>

E) Equities: Disclosures for Banking Book Positions

Qualitative Disclosures:

a)	The general qualitative disclosures requirement with respect to equity risk, including	
	Differentiation between Holdings on which capital gains are expected and those taken under other objectives including for relationship and strategic reasons;	Investment of EXIM Bank in equities is divided into two categories: quoted equities (which are traded in the secondary market) and unquoted equities (which are not traded in the secondary market). Since the intent of holding unquoted equities is not trading, the same are considered as banking book equity exposure.
	Discussion of important policies covering the valuation and accounting of equity holdings in the banking book. This includes the accounting techniques and valuation methodologies used, including key assumptions and practices affecting valuation as well as significant changes in these practices	<p>The banking book equity exposure is mainly held for strategic purpose. EXIM Bank has 03 (Three) subsidiary companies namely; i) EXIM Exchange Company (UK) Limited, ii) EXIM Exchange Company (Canada) Limited iii) EXIM Islami Investment Limited, which are held for strategic business reason.</p> <p>The banking book securities are shown at cost price and market value determined by netting off the impairment loss and no revaluation reserve has been created against these equities.</p>

Quantitative Disclosures:

Disclosures on Risk Based Capital (Pillar III of Basel III)

F) Profit Rate Risk in Banking Book (PRRBB)		
Qualitative Disclosure:		
a)	The general qualitative disclosure requirement including the nature of PRRBB and key assumptions, including assumptions regarding investment prepayments and behavior of non-maturity deposits, and frequency of PRRBB measurement.	<p>Profit rate risk is the risk which unfavorably affects a bank's financial condition due to changes in market profit rates. The value of the On Balance Sheet and the Off Balance Sheet position of the Bank would be adversely affected with the change in the profit rate. Both the current earnings (earnings perspective) as well as the net worth of the bank (economic value perspective) are negatively affected for changing profit rates. The profit rate risk is assessed by the bank both in earning and economic value perspective. EXIM bank monitors the size of the gap between Rate Sensitive Assets (RSA) and Rate Sensitive Liabilities (RSL) in terms of remaining time of re-pricing for evaluating the impact of profit rate risk on the net profit margin.</p> <p>Re-pricing risk for the bank which is regularly measured by comparing the volume of bank's assets that mature or re-price within a given time period with the volume of liabilities. In short term, changes in profit rates impact the bank's Net Investment Income (NII) and in a longer term, it impacts the cash flows on the assets, liabilities and off-balance sheet items that may rise to a risk to the net worth of the bank arising out of all re-pricing mismatches and other profit rate sensitive position.</p>

Quantitative Disclosures:					
As on December 31, 2017 (BDT in crore)					
b)	The increase/ (decline) in earnings or economic value (or relevant measure used by management) for upward and downward rate shocks according to management's method for measuring PRRBB, broken down by currency (as relevant)	Particulars	1-90 days	Over 3 months to 6 months	Over 6 months to 12 months
		Rate Sensitive Assets	3,735.13	4,769.40	7,467.96
		Rate Sensitive Liabilities	11,756.57	3,097.37	5,502.58
		GAP	(8,021.44)	1,672.03	1,965.38
		Cumulative Gap	(8,021.44)	(6,349.41)	(4,384.02)
		Adjusted profit rate changes	1%	2%	3%
		Earnings impact	(43.84)	(87.68)	(131.52)

G) Market Risk	
a) Qualitative Disclosures:	
Views of Board of Directors on trading/ investment activities:	<p>Market risk is defined as the possibility of losses in on and off-balance sheet positions arising from movements in market prices. The exposure of the bank to market risk arises principally from customer-driven transactions. The market risk positions subject to this requirement are:</p> <ul style="list-style-type: none"> i) The risks pertaining to profit rate related instruments and equities in the trading book. ii) Foreign exchange risk and commodities risk throughout the bank (both in the banking and in the trading book). <p>Trading book comprises position in financial instruments held with trading intent or in order to hedge other element of the trading book. The portfolio of investment of EXIM Bank includes Bangladesh Government Islami Investment Bond (BGIIB), Share of listed public limited companies etc. The bank has always put impetus on investment of funds in high yield areas and also has ensured maintenance of statutory liquidity requirement as set by Bangladesh Bank. The Board of Director approves all necessary policies related to market risk and review them on regular basis.</p>
Methods used to measure Market risk:	<p>There are several methods use to measure market risk and the bank uses those methods which deem fit for a particular scenario. For measuring profit risk from earnings perspective, the bank uses maturity gap analysis, Duration Gap analysis, and mark to market method and for measuring foreign exchange risk, the bank uses VaR analysis. The Bank uses standardized method for calculating capital charge against market risks for minimum capital requirement of the Bank under Basel-III.</p>
Market Risk Management system:	<p>The Treasury & Financial Institution Division manage market risk covering Liquidity, profit rate and foreign exchange risk with oversight from Assets Liability Management Committee (ALCO) comprising Senior Executives of the Bank. ALCO is chaired by the Managing Director & CEO of the Bank. ALCO meets at least once in a month.</p>
Policies and processes for mitigating market risk:	<p>The bank has put its Asset Liability Management policy by setting various risk limits for effective management of market risk and ensuring that the operations are in line with bank's expectation of return to market risk through proper Asset Liability Management. The policies also deal with the reporting framework for effective monitoring of market risk.</p> <p>The ALM Policy specifically deals with liquidity risk management and profit rate risk management framework. Liquidity risk is managed through Gap & Duration analysis, based on residual maturity/behavioral pattern of assets and liabilities, as prescribed by the Bangladesh Bank. The Bank has put in place mechanism of Liquidity Contingency Plan. Prudential (Tolerance) limits are prescribed for different residual maturity time</p>

Disclosures on Risk Based Capital (Pillar III of Basel III)

	<p>buckets for efficient Asset Liability Management. Liquidity profile of the Bank is evaluated through various liquidity ratios/indicators.</p> <p>Foreign Exchange risk is the risk or chance of loss due to unexpected movement of market price of the currencies of different countries or the price of the assets denominated by foreign currencies. For effective and efficient management of Foreign Exchange Risk, the Bank has a well-developed and well-structured Foreign Exchange Risk Manual and an international standard Dealing Room Manual. Various limits are set to monitor and mitigate the Foreign Exchange risk such as, Net Open Position (NOP) limits (Day limit / Overnight limit), deal-wise cut-loss limits, Stop-loss limit, Profit / Loss in respect of cross currency trading etc. and exception reporting is regularly carried out.</p> <p>The Treasury of the Bank is mainly divided into three departments namely Front Office, Mid Office and Back Office. The Front Office independently conducts the transactions and the Back Office is responsible for settlement of those transactions after verifying of the deals and passing for those entries in the books of account. The Mid Office plays a vital role in the process by checking the Foreign Exchange procedure perform by Front and Back Office and by reporting it directly to the Managing Director & CEO of the Bank.</p> <p>All foreign exchange transactions are revaluated at Mark to Market rate as determined by inter-bank. All Nostro accounts are reconciled on monthly basis and outstanding entries are reviewed by the management for their settlement.</p>

H) Operational Risk	
a) Qualitative Disclosures	
Views of Board of Directors on system to reduce Operational Risk:	Operational Risk is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. It is inherent in all of the Bank's activities. Operational risks are monitored and, to the extent possible, controlled and mitigated. The Bank's approach to operational risk is not designed to eliminate risk altogether but rather, to contain risks within levels deemed acceptable by senior management. All functions, whether business, control or logistics functions, must manage the operational risks that arise from their activities. This is supported by an independent program of periodic reviews undertaken by internal audit, and by monitoring external operational risks events, which ensure that the group stays in line with industry best practice and takes account of lessons from publicized operational failures within the financial services industry.
Performance gap of executives and staffs:	EXIM Bank mitigates the performance gap of executives and staffs by bridging their knowledge gap and making them acquaintances with the process & policies of the bank through proper training which includes on-job and off-job training, seminars and conferences related to skill development, job rotation, study circles and time to time counselling. Simultaneously, the bank motivates its employees in minimizing their own performance gap by ensuring friendly & decent environment in its workplace, equal opportunity & fair treatment, establishing ethical behaviour by following standard code of conduct and above all providing competitive pay packages & benefits.
Potential external events:	<p>The potential external events that may pose the bank into operational risks are as follows.</p> <ol style="list-style-type: none"> 1. External Fraud: Acts by a third party, of a type intended to defraud, misappropriate property or circumvent the law. Examples include robbery, forgery, and damage from computer hacking. 2. Taxation Risk: Sudden changes in tax laws and regulation that hamper the profitability of a bank. 3. Legal Risk: Legal risk is the risk of the Bank's losses in cases of i) incompliance of the Bank with the requirements of the legal regulations ii) making legal mistakes in carrying out activities iii) Imperfection of the legal system iv) Violation of legal regulations, terms and conditions of concluded agreements by the counterparties. 4. Damage of physical asset: Loss or damage to physical assets from natural disaster or other events. Example includes terrorism, vandalism, earthquakes, fires, floods etc. 5. Business disruption and system failures: Disruption of business or system failures. Examples include telecommunication problems, utility

Disclosures on Risk Based Capital (Pillar III of Basel III)

	<p>n = number of the previous three years for which gross income is positive.</p> <p>Gross Income (GI) is defined as “Net Investment Income” plus “Net non-Investment Income”. It is intended that this measure should:</p> <ul style="list-style-type: none"> i). be gross of any provisions; ii). be gross of operating expenses, including fees paid to outsourcing service providers iii). exclude realized profits/losses from the sale of securities held to maturity in the banking book; iv). exclude extraordinary or irregular items; v). exclude income derived from insurance.

I) Liquidity Ratio

a) Qualitative Disclosures

Views of BOD on system to reduce Liquidity Risk	Liquidity risk arises from either the bank's inability to meet its obligations as they fall due or to fund increases in assets without incurring unacceptable cost or losses. The Board of Directors (BOD) looks upon liquidity risk as a significant risk. The BOD approves various policies as to liquidity risk management and approves tolerance limit for various liquidity risk indicators. They also review these regularly.
Methods used to measure Liquidity Risk:	We measure liquidity risk by checking status and trend of various internal and external liquidity indicators like CRR/SLR surplus, Investment Deposit Ratio (ID Ratio), Liquidity Coverage Ratio (LCR), Net Stable Funding Ratio (NSFR), Maximum Cumulative Outflow (MCO), national and global economic and

Disclosures on Risk Based Capital (Pillar III of Basel III)

Liquidity Risk management system:	<p>political status and outlook etc. We also keep an eye on the market dynamics to trace any unforeseen liquidity risk. We perform gap analysis between deposit and investment to forecast need for liquid assets. If the gaps in various time bands are beyond prescribed limit or if the liquidity indicators exceed limit, we consider that as an indication of liquidity risk. We regularly observe updates in economic, political and market conditions both home and abroad. We regularly survey deposit rates of peer banks. We also perform various other analyses like sensitivity analysis, gap between rate sensitive assets and liabilities, sizewise, ratewise-categorywise, ratewise-productwise analysis of deposits and investments etc.</p> <p>We have necessary organizational structure, systems, policies and procedures for managing liquidity risk of our bank. We have a separate division named as “Treasury & Financial Institutions Division (TFID)” major task of which is to manage Asset Liability Management (ALM) risk i.e., liquidity risk and profit rate risk. We have Asset and Liability Management Committee (ALCO) formed in line with Bangladesh Bank guidelines. There is a separate and well staffed ALM Desk in TFID under direct supervision of ALCO. The ALCO sits at least once in a month and regularly reviews various ALM risk indicators as presented through ALCO Papers.</p> <p>Day to day liquidity is managed based on considering inflow/outflow through Bangladesh Automated Clearing House (BACH). We use asset conversion method, borrowed liquidity method or mixed method in managing liquidity considering their relative cost and benefit. If there is surplus fund, we place our fund with other shariah based banks and Financial Institutions (FIs) or return interbank deposit. On the other hand, if there is shortfall, we take interbank deposit for short term or withdraw our fund with other banks and FIs. If gaps in the buckets in the maturity profile exceed limit, we change provisional rate of our deposit products in such a way so that, deposits move from surplus buckets to deficit buckets.</p>
--	--

Disclosures on Risk Based Capital (Pillar III of Basel III)

Policies and processes for mitigating Liquidity Risk:	<p>The bank has an ALM guideline rich in contents, liquidity management policy, transfer pricing policy, profit rate policy, Management Action Trigger (MAT), wholesale borrowing and funding guidelines, Contingency Funding Plan (CFP) etc which are reviewed at least annually. We try to keep CRR surplus as low as possible but not below a minimum amount as approved by the Board. This is done for mitigating the risk of being unable to maintain CRR at any time. Our board has approves limits of key liquidity indicators.</p> <p>We take information about large fund flows from branches and concerned divisions of head office a-priori so that we can avoid any unforeseen liquidity pressure and meet any fund requirement using low cost source or place idle fund with other banks and FIs. We monitor the liquidity indicators regularly and take immediate actions if any unforeseen risk is detected.</p>

J) Leverage Ratio	
a) Qualitative Disclosures	
Views of BOD on system to reduce excessive leverage:	In many cases, banks built up excessive leverage while apparently maintaining strong risk-based capital ratios. Subsequently, the banking sector was forced to reduce its leverage in a manner that not only amplified downward pressure on asset prices, but also intensified the positive feedback loop between losses, declines in bank capital and reduction in credit availability. In order to avoid building-up excessive on- and off-balance sheet leverage the board of directors of the bank prefer a simple, transparent, non-risk based leverage ratio which is calibrated to act as a credible supplementary measure to the risk based capital requirements.
Policies and processes for managing excessive on and off balance sheet leverage:	<p>The leverage ratio is intended to manage through following manner:</p> <ul style="list-style-type: none"> a) Constant monthly monitoring of the build-up of leverage in the bank by the Treasury Division and Investment Risk Management Division. b) Strengthen the risk based requirements through branch level as well as Head office.
Approach for calculating exposure:	<p>The Bank has calculated the regulatory leverage ratio as per the guideline of Basel III. The numerator, capital measure is calculated using the new definition of Tier I capital applicable from 01 January 2016. The denominator, exposure measure, is calculated on the basis of the Basel III leverage ratio framework as adopted by the Bangladesh Bank. The exposure measure generally follows the accounting value, adjusted as follows: -</p> <ul style="list-style-type: none"> a) On-balance sheet, <ul style="list-style-type: none"> i. non derivative exposures are included in the exposure measure after netting of specific provision; ii. physical or financial collateral is not considered to reduce on-balance sheet exposure; iii. Investments are not netted with deposits; c) Off balance sheet items are converted into credit exposure equivalents through the use of credit conversion factors (CCFs). Depending on the risk category of the exposure a CCF of 20%, 50% or 100% is applied. Commitments that are unconditionally cancellable at any time by the

Disclosures on Risk Based Capital (Pillar III of Basel III)

	<p>bank without prior notice, a CCF of 10% is applied;</p> <p>The banks maintains leverage ratio on quarterly basis. The calculation at the end of each calendar quarter to be submitted to BB based on the following definition of capital and total exposure.</p> $\text{Leverage Ratio} = \frac{\text{Tier 1 Capital (after related deductions)}}{\text{Total Exposure (after related deductions)}}$
--	---

b) Quantitative Disclosures:

Sl. No.	Particulars	Solo	Consolidated
1	Leverage Ratio	6.70%	6.70%
2	On balance sheet exposure	32,660.22	32,713.51
3	Off balance sheet exposure	4,518.19	4,518.19
4	Regulatory adjustment made to Tier I capital	69.38	69.38
5	Tier I capital. (Considering all regulatory adjustment)	2,485.22	2,489.17
6	Total exposure = { (2+3) - 4}	37,109.03	37,162.32

K) Remuneration:	
Qualitative Disclosures:	
<p>a) Information relating to the bodies that oversee remuneration: The qualitative remuneration information disclosed below are broader in scope and cover all individuals included in the Remuneration Policy of Export Import Bank of Bangladesh Limited; whereas the quantitative information relates to senior manager sand material risk takers of the bank and its subsidiaries.</p>	
<p>i) Name, composition and mandate of the main body overseeing remuneration.</p>	<p>The remuneration issues in EXIM Bank are overseen by a five-member Remuneration Committee. It comprises the Managing Director & CEO, three Deputy Managing Directors and the Head of HR. The primary functions of the Remuneration Committee are to determine, review and propose principles and governance framework for all decisions relating to remunerations of the employees of EXIM Bank. While the Human Resources Division is responsible for preparing and recommending reward plans and compensation, the committee's duties are to assess and review these recommendations and submit them to the Board of Directors for approval.</p>
<p>ii) External consultants whose advice has been sought, the body by which they were commissioned, and in what areas of the remuneration process.</p>	<p>Currently, there is no external remuneration consultant, whose advice is being sought. The Committee obtains remuneration information directly from the Human Resources Division of the bank.</p>
<p>iii) A description of the scope of the bank's remuneration policy (eg by regions, business lines), including the extent to which it is applicable to foreign subsidiaries and branches.</p>	<p>Our remuneration policy provides guiding principles that drive remuneration related decision-making across every level of our bank, including its one local and two foreign subsidiaries.</p>
<p>iv) A description of the types of employees considered as material risk takers and as senior managers, including the number of employees in each group.</p>	<p>The bank has identified employees in key areas and functions whose impact on the risk profile of the bank will always be material, and also employees with the authority to take risks above thresholds that are defined based on the institution's capital figures. The bank has also set out criteria to identify staff in control and other functions, including the members of the management body in its supervisory function, whose professional activities have a material impact on the institution's risk profile because of their responsibilities, e.g. for managing risks or developing or overseeing the institution's strategy. Other criteria are based on the authority of staff to commit to investment risk exposures and market risk transactions above</p>

Disclosures on Risk Based Capital (Pillar III of Basel III)

	<p>certain thresholds. In particular, all members of the senior management, Divisional Heads, Regional Managers and Branch Relationship Managers have been identified as senior managers and/or material risk takers. The number of employees in each group is as follows-</p> <table border="1"> <tr> <th>Senior Manager</th><th>Material Risk Taker</th></tr> <tr> <td>7</td><td>137</td></tr> </table>	Senior Manager	Material Risk Taker	7	137
Senior Manager	Material Risk Taker				
7	137				
b) Information relating to the design and structure of remuneration processes.					
<p>i) An overview of the key features and objectives of remuneration policy.</p> <p>ii) Whether the remuneration committee reviewed the firm's remuneration policy during the past year, and if so, an overview of any changes that were made.</p> <p>iii) A discussion of how the bank ensures that risk and compliance employees are remunerated independently of the businesses they oversee.</p>	<p>EXIM Bank is committed to maintaining fair, balanced, performance-oriented compensation practices that align with long-term employee and shareholder interests. The bank believes in rewarding employees for performing in a way that creates sustainable values for the bank and its shareholders over the time. We believe that well-established and clearly communicated core remuneration values drive fairness and consistency across our bank.</p> <p>The committee reviewed the bank's remuneration policy in the 2017 financial year; however it felt no changes were necessary to be made.</p> <p>Employees engaged in control functions (risk management, human resources, audit, compliance, etc.) are independent from the business units they oversee, have appropriate authority, and are compensated in accordance with the achievement of the objectives linked to their functions, independent of the performance of the business areas they control.</p>				
c) Description of the ways in which current and future risks are taken into account in the remuneration processes.					
<p>i) An overview of the key risks that the bank takes into account when implementing remuneration measures.</p> <p>ii) An overview of the nature and type of the key measures used to take</p>	<p>All of our remuneration practices are carefully managed within the risk taking capacity of the bank. The key risks like- Financial Risks, Operational Risks, Compliance Risks, Reputational Risks, and Employee Turnover Risks; etc. are taken into account for managing and determining remuneration arrangements.</p> <p>Risk is a key factor in assessing remuneration outcomes. In this regard, we use financial capacity of the bank to measure remuneration packages. Side by side, we also consider</p>

<p>account of these risks; including risks difficult to measure (values need not be disclosed).</p> <p>iii) A discussion of the ways in which these measures affect remuneration.</p> <p>iv) A discussion of how the nature and type of these measures has changed over the past year and reasons for the change, as well as the impact of changes on remuneration.</p>	<p>operational impacts, cost of living adjustments, relevant compliances, industry-competitive remuneration in relation to the market reputation and other effective risk-adjusted measures in determining remuneration</p> <p>We approach all of our remuneration arrangements, especially the periodic fixed remuneration enhancements and the variable compensation arrangements through an integrated risk, finance, compensation and performance management framework. All annual base salary increments and potential variable remuneration awards are reviewed at the end of each financial year and may be adjusted downwards where material risk issues occur.</p> <p>The management of the bank has been considering the reasonable grounds for amending and measuring the remuneration arrangements from time to time in order to ensure risk adjusted business operations and employee satisfaction simultaneously.</p>
<p>d) Description of the ways in which the bank seeks to link performance during a performance measurement period with levels of remuneration.</p>	
<p>i) An overview of main performance metrics for bank, top-level business lines and individuals.</p> <p>ii) A discussion of how amounts of individual remuneration are linked to bank-wide and individual performance.</p>	<ul style="list-style-type: none"> • Revenue per employee; • Risk-adjusted net profit margin; • The ability to generate fee income; • Investment quality. • Return on equity • Return on assets • Efficiency ratio • Non performing investment ratio • Investment Deposit ratio • Cost of fund • Book value per share <p>In EXIM Bank, amounts of individual remuneration do not contain any direct formulaic link between business income and individual reward. Differentiating performance and value ratings at all levels enable us to target spend towards those who have made the most effective contribution to the bank's performance and unique culture, recognises and aids retention of our highest</p>

Disclosures on Risk Based Capital (Pillar III of Basel III)

<p>iii) A discussion of the measures the bank will in general implement to adjust remuneration in the event that performance metrics are weak</p>	<p>performers and balances this with affordability considerations.</p> <p>Risk measures are used as a gate opener for any performance based remuneration. Remuneration outcomes are assessed against individual performance (against business goals set at the beginning of the performance year) and bank's risk taking capacity. All potential incentive awards are reviewed at the end of financial year and may be reduced or adjusted to zero in the event of any risk management issues.</p>
<p>e) Description of the ways in which the bank seek to adjust remuneration to take account of longer-term performance.</p>	
<p>i) A discussion of the bank's policy on deferral and vesting of variable remuneration and, if the fraction of variable remuneration that is deferred differs across employees or groups of employees, a description of the factors that determine the fraction and their relative importance.</p>	<p>Currently we do not offer any variable remuneration that may be deferred or vested either in the form of cash, shares or share-linked instruments. However, employees are eligible for variable remuneration arrangements in the form of Incentive Bonus (non-deferred cash awards), applicable to their positions.</p>
<p>ii) A discussion of the bank's policy and criteria for adjusting deferred remuneration before vesting and (if permitted by national law) after vesting through claw-back arrangements.</p>	<p>Not applicable.</p>
<p>f) Description of the different forms of variable remuneration that the bank utilises and the rationale for using these different forms.</p>	
<p>i) An overview of the forms of variable remuneration offered (i.e, cash, shares and share-linked instruments and other forms.</p>	<p>The structure of remuneration arrangements for all employees primarily consists of a fixed remuneration component, which is made up of base salary, allowances, and other benefits. Employees are also eligible for variable remuneration arrangements applicable to their position. Variable remuneration consists of Incentive Bonus (cash awards) for most of our employees.</p>
<p>ii) A discussion of the use of the different forms of</p>	<p>Incentive Bonus awards are discretionary and recognise annual</p>
